salesforce

* ROI = Return of the investment

$$ROI = \frac{\text{Net income}}{\text{cost of investment}} \times 100$$

Salesforce platform

customer 360 gives your entire business

→ Automation

→ Intelligence

→ Real-time data.

what does salesforce do?

→ salesforce makes a software that gives companies a complete view of their customers to build deeper relationships.

CRM → customer relationship management
Getting or knowing the customer's behaviour like

→ Search histories in our website

→ purchase habits and others.

* salesforce is a software ~~we we can~~
it allows to see and manage
our customers in one place

what is salesforce used for?

→ Maintaining CRM, improving customer's experience.

5 core values of customer 360:

→ Trust

→ customer success

→ Equity

→ Innovation

→ Sustainability.

Interface SALES

leads, opportunities, tasks

object:

An object just being a digital representation of a real thing.

→ we cannot put our customers or any person in salesforce CRM, so, we put a digital form or record or a form in order to represent them.

* objects are nothing but different types of records.

Guidance centre: salesforce resources helps us to how to use.

→ Depending on our usage we can modify the backend of the salesforce

→ leads (B2B), contacts (B2C) contains information

→ Account based marketing, we use accounts section.

→ leads section is independent from others

→ leads can be converted into accounts, opportunities.

→ salesforce commitment is to business as a platform for change with the 1-1-1 model.

1 percent - employee's time

1 percent - equity

1 percent - product to non-profits.
